☐ **Should not be changed:** by selecting this option, the username@aruba.it used to access the site and manage services will remain the same and the registered details for the username@aruba.it will not be updated, remaining therefore in the name of the current holder.

This option is recommended if the management of the domain needs to be linked to an @aruba.it username in the name of a new registrant or third party.

This replacement enables management (including for any active third level domains) to be transferred from one person to another or between 2 usernames linked to the same person.

If the new username has not yet been created, it will need to be generated at [signup.aruba.it](https://signup.aruba.it) as explained in the [relevant article](#).

- Within 15 days following an update, an email will be sent to the new email address, with a link to verify the updated details.
- For 60 days following the update, the domain name will be subject to a transfer-lock, meaning that the domain cannot be transferred to another Registrar. If you wish, you can opt out of the domain transfer-lock.

☐ **I wish to opt out of the 60-day domain transfer-lock following the changes I am making.**
